

MANUFACTURING

Jobs in manufacturing are more technically demanding and specialized than ever before, and the ongoing evolution of this industry has led to unique challenges for employee onboarding. To meet these challenges requires a partner that brings innovation, extensive capabilities, and credibility to the design and deployment of any training solution. That's where AllenComm comes in. Major manufacturing brands trust us to create training related to digital systems, machine operations, safety, compliance, new products, and leadership.

We've built hundreds of manufacturing training solutions and have cultivated the insider knowledge required to design effective manufacturing onboarding, training, and compliance solutions. Together, we'll make your employees feel valued, train them in the mission and values of your company, and give them the hands-on skills to meet your high standards for quality and safety.

TYPES OF MANUFACTURING TRAINING

EXPERIENCE

We've built hundreds of learning solutions for clients around the world for everything from on-the-job skills training to rigorous safety training and refresher courses. What's more, we have the largest

in-house instructional design, agency-level creative and innovative technology teams in the industry, so we can turn even the most technical material into an easy-to-use and informative training program.

INSIGHT

The best solutions come from collaboration, and here at AllenComm, we combine your expertise in manufacturing with our expertise in training. With our custom training programs, your employees will learn about safety risks and avoidance strategies from day one, and we make sure that your on-the-job resources and just-in-time training materials are easy to

understand and use. In fact, we have developed in-house some of the most cutting-edge tools in the industry—including web-based courses, mobile options, microlearning, gamified training, and even augmented and virtual reality simulations—to build effective custom solutions for your unique training needs.

RESULTS

In our work with one global manufacturing client, we synthesized their firsthand knowledge of safety and efficiency challenges in their factories using a combination of web-based training courses and augmented reality. Our manufacturing client, in one area of their factory, reduced new employee onboarding and training times for one complex machine by 30%, saving tens of thousands of

dollars per hour in downtime and increased employee retention by over 70%.

At the intersection of your business needs and our expertise, we'll work together to create effective training options that will encourage safe practices, promote engagement, and set your employees up for success.
